Environment Information

This environment consists of a GRID VM and an R12 Vision Instance.

Steps to access the environment:

1) Connect to GRID VM using SSL VPN +RDP

A) Connect to SSL VPN –

1. To access OUVPN, navigate to any of the following URLs (depending on your location).
 - <https://ouvpn-in.oracle.com> (APAC) or <https://ouvpn-uk.oracle.com> (EMEA) or <https://ouvpn-us.oracle.com> (AMERICAS)
2. You will be prompted for OUVPN username and password.
Example: user name: 99972122.user01, password: th7nKU
3. Click "**Click here to make Connection**". Once started, the system will download and install an ActiveX ArrayVPN software and connect to the OU network.
4. Once connected, the message box will disappear and a small red "A" icon will appear on the toolbar at the bottom of the desktop.

Now you have an SSL/VPN connection ready and you can connect to the assigned GRID VM!!

Important! Don't close the browser connection labeled 'Welcome'. You can simply minimize it.

- B) Using RDP, connect to the GRID VM – egXXXX.us.oracle.com (where egXXXX is the GRID VM provided to you)

2) Once inside the GRID VM:

- a) Use the WorkFlow Builder tool to do the labs.
- b) While saving your workflow definition to the class database, use the following details –
 - User Name - apps
 - Password - apps
 - Connection String – egYYYY (i.e., the R12 Vision Instance)
- c) Whenever the lab requires, connect to the R12 Vision instance using the browser available on the GRID VM by using the following URL:

http://egYYYY.us.oracle.com/OA_HTML/AppsLocalLogin.jsp

(where egYYYY is the R12 Vision instance provided to you)
